MIRROR ALTA. OCT. 31, 1913

STRAY ANIMAL ORDINANCE

The Alberta Estray Law pre-
scribes that the party who
takes up an estray animal must
immediately notify the brand
reader nearest to his place to
come out and examine the an-
imal and take a copy of the
brand, if any, on the animal.
Then an advertisement must be
inserted in the nearest local
paper and also in the Alberta
Gazette, and until the law is
complied with the holder of an
estrays cannot collect any fee
for his trouble or feed. Prompt
action must be taken, the law
being very strict in this regard.
The brand readers are entitled
to a fee of \$2 for each animal
they examine and mileage to
the amount of 10¢ per mile for
the first ten miles. The cost of
advertising and the reading of
the brands is a charge against
the estray animal and must be
paid in advance.

The party holding the animal is
responsible for all charges
until it is sold or redeemed by
the owner. No charges for
feed are allowed between the
15th day of April and the 15th
day of November. From No-
vember 15th to April 15th a fee
of 15¢ per head per day is al-
lowed for horses and cattle dat-
ing from the day on which the
notice is mailed to the owner
of the estray animal or to the
Alberta Gazette, but not ex-
ceeding the sum of nine dol-
lars. South of the 29th town-
ship only five cents a day is
allowed for feed and the total
is limited to three dollars.

A man crawled into a hollow
log to get out of the rain. The
thunder rolled, the rain poured
down in torrents, and the log
swelled up until the poor fel-
low was unable to move. Face
to face with a cruel death, he
began to think upon his sins.
Finally he recalled that he had
not paid his subscription to
THE MIRROR JOURNAL; that
made him feel so small that he
crawled out through a knot-
hole, and hid himself straight-
way to the editor's sanctum
with the necessary dollar Wil-
liam.

Discussing the problem of
fire fighting with water or
chemicals, it is interesting to
note that the statistics of the
National Firemen's Association,
at a recent meeting in Chicago,
predicts that within five years
the use of water in fire fighting
will almost disappear. He be-
lieves that guns for shooting
powdered chemicals will be sub-
stituted, or chemical bombs.

INTO CALGARY END OF NOVEMBER

Calgary, Oct. 21. — The G. T. P.
is preparing to start operations
over their road into Calgary
just as soon as the price for the
barracks property is settled at
the exchequer court to be held
in Calgary for that purpose
November 12. The district en-
gineer was in Calgary Thursday
and stated that the material for
the station and the steel for the
yards is being prepared in
all haste, and if the price is suit-
able the G. T. P. will take over
the site at once, and will put
down the yards during the
winter months. The station
will not be started before next
spring.

The road does not want to
put up even temporary build-
ings until they are satisfied that
the barracks property will be-
long to them. The engineer
stated that the road has options
on other property along the
bank of the Bow river
which will be converted into a
station site if the price placed
on the barracks property is too
high.

"The railroad feels assured
that it will have trains running
on a daily schedule not later
than the last of November into
Calgary. If we get the bar-
racks site trains will run into
Calgary before November 20.

FRUIT PACKING

Canadian fruits, than which
there are none better, are now
regarded in the markets of the
world at their true worth.
Through the operations of the
Inspection and Sale Act the
packing of Canadian fruit has
been greatly improved and the
development of the trade ac-
celerated. From time to time
since its enactment, as experi-
ence has indicated, the Act has
been improved in order to more
completely encourage and pro-
tect the industry. The latest
amendment to the Act, which
was passed during the last
session of Parliament, extends
inspection to imported fruit
thereby placing it on an equal
footing with that grown in
Canada. The amendment pro-
vides that the Governor in
Council by regulation may pre-
scribe the kinds of imported
fruit the packages containing
which must be branded or
marked; the brand or marks
to be used thereon, as well as
the methods and places where
such branding shall be done.
Other minor changes were ef-
fected in the Act.

Canada is nearly thirty times
as large as Great Britain and
Ireland, the total area of the
Dominion being only 237,000
square miles less than that of
the whole continent of Europe.

INTEREST SOON COUNTS

One of the causes of bankruptcy is that so few persons properly estimate the difference between a high and a low rate of interest, and therefore often borrow money at a ruinous rate that no legitimate business can stand. Few have figured on the difference between 6 and 8 per cent. One dollar loaned for one hundred years at six per cent, with the interest collected annually and added to the principal, will amount to \$340. At eight per cent, it amounts to \$2,203, or nearly seven times as much. At 3 per cent, the usual rate of interest in England, it amounts to \$19.25; whereas at 10 per cent, which has been a very common rate in the United States, it is \$13,809, or about seven hundred times as much. At eighteen per cent, it amounts to \$15,145,007. At twenty-four per cent, (which we sometimes hear talked of, it reaches the enormous sum of \$2,551,704,041.

One hundred dollars borrowed at six per cent, with the interest compounded annually will amount to \$1,842 in fifty years, while the same one hundred dollars borrowed at eight per cent, will amount to \$4,000 in fifty years. One thousand dollars at ten per cent, compounded, will run up to \$117,300 in fifty years.

NOW IS THE TIME.

If there is a time during the year when you should go and impress the public with the fact that it pays to deal with you, right now is when you should set it—the beginning of the buying season.

Haven't you often found that many of your neighbors, when they want to buy, send the business to your out-of-town rivals—the catalogue houses—simply because these catalogue houses have advertised and created the impression that their prices were lower than yours? Of course you have—this is going on every day, and the result is, you are losing mighty good business which rightfully belongs to you.

Are you going to let this continue, or are you going to go out yourself and show your neighbors that you can save them money—give them values—make it worth their while to trade with you.

We are here to help you, and we want you to get this business which strangers are now coming in and taking away from you.

The Dominion Postoffice Department has issued the following warning: "Letters from the Spanish prisoner are actively circulating in Canada. These letters are mailed at Madrid. In the latest case is a Russian banker who is in prison. At other times it is either a French or Spanish character, but the essential part of the fraud is the same, viz, that the prisoner has an immense sum of money in hiding and generally an interesting daughter. On certain conditions he is willing to share his treasure with and entrust his daughter to the person in whom he is confiding. As an evidence of good faith a certain sum of money must be put up by the correspondent. A gentleman in Prince Edward Island was induced to part with \$700 in this way. The case is a pure fraud and the public are warned."

Advertising is trade news. A man has something to sell. There are two ways of selling. The old fashioned way was to put the goods in the shop window and leave people to find out that they are there. The new fashion in selling uses advertising, and is certain you know the goods are in the window before you set out to shop. You read about the goods before you set out to buy—Advertisers' Weekly.

LOVE CONQUERS ALL THINGS

BY ARTHUR APPLIN

Ward, Jack & Co., Limited, London, Melbourne and Toronto

(Cont'd - 4)

You see he could extend his practice as with a motor-car, and if the worst came to the worst, he could go to it to begin with, and he would be sure to smash himself up and then send for him to put them together again!

Hesterington laughed, and Peggy gave a sigh of satisfaction. I don't believe you are a happy man, in spite of your wealth and the good time you have.

I am happy today, he said under his breath.

The remark caused temporary silence. Hesterington's thoughts were running on the subject again. He took great interest in Dr. Murray. He is clever, I suppose.

Peggy shrugged her shoulders. He has not much chance of showing it here, nothing to do but to welcome the new generation and feed the old. You will find in this little village that everybody takes an interest in everybody else. I wonder how you will stand it?

This was Hesterington's opportunity. He reduced speed and began to crawl along at a comfortable fifteen miles. I am going away at the beginning of the week.

Peggy snuggled into the heavy coat she was wearing. You've got tired of us quickly.

I am going away on business, but I shall come back before I am wanted, so waiting for such expecting a reply but none came. "You see, I am wanted!" There was more anxiety in his voice than after the occasion of the question.

Peggy did not mean to be cruel, but her quick woman's instinct told her that he was not going to stay. She had not seen him for five years, and she knew how it could narrow that question in less than fifteen days.

Don't suppose it is a little more than a little nice for everybody in the world.

I have not found him yet—I am looking for it.

Again he bent towards Peggy. He took one hand off the steering wheel. It hovered over her. I am looking for my little Miss Helen. You could be his friend if it was you.

He altered the engine and he was a boy of sixteen. Though perhaps he did not realize it himself, any woman would have known that he had made a confusion of woe.

We ought to be going back, Peggy said.

Without a word Hesterington turned the car. And now he sent her along at the top speed. I shall see you again before I go, he cried, raising his voice to make it heard above the wind and rumble of the engine.

He wanted to know before I go, that is, it was difficult to say without making an absolute declaration of love, and it was too soon for that. Had he not been in the delicate state of love making? Had he been merely for love?

Well! Peggy looked up at him with a tantalizing smile upon her red lips.

He set his teeth and stared straight ahead at the white road which the car devoured. Something he said to me the day I returned home. I think I do not know how the engine works the result of the accident. If I tried to explain now you wouldn't understand, but it is nothing.

He closed the door, shut the engine out as if it had never existed, opening up a future which, but for one thing would be the dearest and the most wonderful. That one thing, Miss Helen.

(Cont'd - 4)

Morgan, stands between me and happiness. I am between me and life itself. You wonder why I am telling you all this? Because you are the only person who seems to understand me, who has taken the trouble to—interested in me, because—

He could not juggle with words any longer. The car was doing her fifty miles an hour now. A sudden turn of the road, a vehicle coming in the opposite direction and the result would be destruction. Hesterington was so conscious of the danger. Peggy was not frightened until Hesterington spoke again.

Because I love you! he blurted out almost breathlessly. I told you my face was almost, his eyes steeled.

The most horrible, so tightly closed was his face. I had to tell you, continued after a breathless exclamation. Because when I saw you, I had some big problems to face.

He was going to say, I loved her. You are going ahead again to the East.

He burst out laughing; to me unknown and mysterious. I do not know what you are thinking, but why I have spoken before my time.

Now, I know it. I do not want any more of you. I want to know that you should care for me yet. I don't want to be able to tell you only that you are free. It would be a strange courage to fight as long as I can hope.

It was true. Peggy Morgan had not seen him for five years. She had not seen him for five years. She had not seen him for five years.

He was not a man to be cruel, but her quick woman's instinct told her that he was not going to stay. She had not seen him for five years, and she knew how it could narrow that question in less than fifteen days.

Don't suppose it is a little more than a little nice for everybody in the world.

I have not found him yet—I am looking for it.

the like of which was to be found nowhere else in the world. It was particularly interesting after the fact of the moorlands. Altogether, London's model of a city, and it was not a cheering reflection that he did not know of any single soul in the whole vast town.

Not even Cranny!—not yet. As he was about to leave, Cranny told him that morning he had received an order telegram from her to come to see her. He had not yet answered it, she could wait until he had seen this collection. His pocket might be more secure than he.

(To be Continued)

HOW LONDON GETS MILK

When the Biggest City Had a Famine So much milk is sent up to London that the price is so high that poor people in country districts have simply to go without it. This was the startling statement made by Lady Meyer at the conference of the National Food Council, which was held at the Grosvenor Hotel last night.

It was not so surprising after all when we remember what a mighty volume of milk the people of the metropolis consume every year—about 112,000,000 gallons—about 100 million of which are supplied by the country districts. It is a fact that the country districts which supply London with milk are not so numerous as they were some years ago. The number of farms which supply London with milk is now only about 1,000, whereas in 1900 there were about 2,000.

At the same time, the demand for milk in London has increased enormously. The population of the city is now about 7,000,000, and the demand for milk is about 1,000,000 gallons a day. This means that the country districts must supply London with about 1,000,000 gallons of milk a day.

The country districts which supply London with milk are not so numerous as they were some years ago. The number of farms which supply London with milk is now only about 1,000, whereas in 1900 there were about 2,000.

At the same time, the demand for milk in London has increased enormously. The population of the city is now about 7,000,000, and the demand for milk is about 1,000,000 gallons a day. This means that the country districts must supply London with about 1,000,000 gallons of milk a day.

The country districts which supply London with milk are not so numerous as they were some years ago. The number of farms which supply London with milk is now only about 1,000, whereas in 1900 there were about 2,000.

At the same time, the demand for milk in London has increased enormously. The population of the city is now about 7,000,000, and the demand for milk is about 1,000,000 gallons a day. This means that the country districts must supply London with about 1,000,000 gallons of milk a day.

Where the Danger Was

The train was undoubtedly a record for speed. It had been travelling at a speed of 100 miles an hour. The passenger who had been sitting in the first class for several hours, got up and strolled along the corridor to the front of the train, where he found the guard playing marbles with the porter.

Hallo, there! he called. I suppose you don't mind a bit of good advice? It's a friendly spirit. The conductor recoiled two marbles and said: "No, sir."

Then why, said the pale passenger, who had been sitting in the first class for several hours, got up and strolled along the corridor to the front of the train, where he found the guard playing marbles with the porter.

Why should we be asked at length, Why, replied the pale passenger, for fear a few more might come along and take his seat?

Warts will render, the prettiest hands unsightly. Clear the complexion by using Holloway's Corn Cure, which acts thoroughly and painlessly.

On the Future Fuel of Navies There can be no doubt that the naval armaments of the world are being increased. A given tonnage of oil or against coal, equal tonnage of oil will enable the navy to steam much faster, and to travel at a speed of 20 knots, and to travel at a speed of 20 knots, and to travel at a speed of 20 knots.

There can be no doubt that the naval armaments of the world are being increased. A given tonnage of oil or against coal, equal tonnage of oil will enable the navy to steam much faster, and to travel at a speed of 20 knots, and to travel at a speed of 20 knots.

HOGS

Fred. Dowswell was a Stettler visitor for a day or two this week.

Mrs. Donald McDonald, who resides about 10 miles north-west of Mirror is reported to be dangerously ill. Dr. Meyer, of Mirror, and Dr. Shores, of Alta, were called in a consultation, and little hope is entertained for her recovery.

Mr. and Mrs. Smith and children, of S. Edmonton, are visiting with Mr. and Mrs. W. J. Kadlec, at Lamerton.

The Imperial Lumber Co. are installing new Fairbanks Pit scales. The scales are situated in front of their building on Carroll avenue, the weighing being done inside the office.

A small coal stove for sale. New this spring. A bargain. Call at THE JOURNAL office.

Miss Olive Wilson, of Stettler, Alta., spent last Sunday and Monday with her sister, Mrs. Fred. Dowswell.

Geo. D. MacMillan went to Calgary Thursday morning for a few days.

Wm. Manning, of Ponoka, Alta., was a visitor in Mirror last Tuesday. Mr. Manning is in the grain-chopping business and is looking for an opening.

W. F. Puffer, M. P. P., was in town last Wednesday.

Robt. Curthres had a field of 47 acres of barley that yielded about 33 bushels to the acre. The grain was of A 1 quality.

M. Meckenburg, A. M., the only university graduate Sight Specialist in Alberta, 315 Jasper E. Phone 3225, Edmonton.

T. J. Scott, of Togo, Alta., is now in charge of affairs at the local G. T. P. depot. He takes the place of Geo. D. MacMillan, who has resigned from the service and who is moving to Winnipeg, Man.

R. M. Whitecotton and son, Murk, of Ponoka, Alta., are spending a few days with Mr. and Mrs. T. R. McCorkell. Mrs. McCorkell is a daughter of the former.

Will the party who took a soft bet at the close of the last dance, by mistake please return the same to THE JOURNAL office, where an exchange will be made.

The four-year old son of Mr. and Mrs. T. W. Hutelinson, of Ponoka, Alta., was burned to death last Wednesday morning. The little fellow had gone into the barn with matches and presumably set fire to the building.

Work on the new vault for the Canadian Bank of Commerce has been started. Mr. Bury is doing the work.

110 tobacco sellers in Edmonton were summoned to appear in the police court for selling cigarettes to boys under age.

Joe Steers and Dr. Fraser, of Bashaw, Alta., were in Mirror on Thursday.

Fred Kalkke, J. P., and Mrs. Kalkke, of Fortinash, Alta., spent several days of this week with Dr. and Mrs. Meyer.

Will the ladies who came into possession of plates other than their own at the Harvest Home supper on Thursday, Oct. 23rd, kindly communicate as possible with Mrs. Oldring.

Read the clubbing offer of THE JOURNAL on page 5, with the leading Daily and Weekly papers. There is a cut on every periodical.

The Tenth Annual Alberta Winter Fair, including the Alberta Provincial Poultry Show, and the Alberta Provincial Fat Stock Show will be held in the Horse Show buildings, Calgary, from November 25th to 28th, 1913.

LOCAL AND GENERAL NEWS

For SALE.—Well built house, 28 x 30, plastered; cellar; 60 foot lot, fenced close in. Enquire at THE JOURNAL 51-17.

Insufficiency has been the centre of some excitement during the past week, indications of oil being the direct cause. Land for miles around has been leased.

The important feature of the fine weather this fall to date is that the farmers have had a better opportunity for fall plowing than at the corresponding period in the last few years.

S. BUFFALO LAKE

Wallace Jaack finished threshing his own crop last week, and reports 8000 bushels all told. His 'Stanley' wheat yielded 30 bus. per acre; oats, 50 bus. and barley, 35 and 40 on respective fields. To doubters on the use of a "Packer," these yields ought to be rather more of a convincing proof of the value of these implements, than if an army of implement-dealers talked to a farmer for a week. We are informed that Mr. Jaack will close his threshing operations for the season this coming week.

R. E. Estell returned home for a few days, not being well. He is now better and able to return to the machine.

Frank Kirkman, the popular Nevis hardware dealer, met with rather a serious accident last week, being thrown from a horse he was riding and receiving some nasty bruises and cuts. His many friends here are glad it was no worse, and that he escaped being permanently injured.

South Buffalo Lake is already noted among hog buyers for the fine class of hogs raised in this locality. The industry received a fresh impetus last week when our worthy citizen, G. J. Estell, received a registered Poland China boar from the celebrated herd of Mr. Weincke, of Stony Mount Inn, Man. Importing from such assistance and from the herd of Mr. Weincke, whose Poland China sweep the honors wherever exhibited, cost Mr. Estell about "fifty good simoleons." With Mr. Estell procuring the best Poland China that can be purchased, and J. H. Sorum handling the same in the Durne Jersey breed, it is no wonder our

hogs are sought for by dealers. Poorer people here that cannot reach out so far, can still surely improve their herd with such stock imported to breed from. O. J. Sorum purchased an exceedingly fine quarter section from C. H. Estell.

Your correspondent, a n d doubtless the majority of your former readers wonder: Why, with good No. 2 wheat bringing less than 60c. at the elevators, flour still hovers around the \$3.50 to \$3.60 mark; the same as when wheat brought 80c. per bus.? It looks as though some one was making good at the expense of the public in general.

M. O. Sorum is evidently not through building operations for the season; a new hen house being in course of erection last week.

(From Nemo)

Breezes from the North

Miss Ussula Sharp, from Stettler, is visiting relatives and friends in this vicinity this week.

Clyde Pitman is home for a few days.

Lester Swarts and Miss Beatie Williams, of Bashaw, spent last Friday evening with Mrs. J. Wright.

Miss Alma Faulk is spending a few days with her uncle, Herman Skode.

Chas. Farnum, from Ponoka, called at Jas. Wright's on the Wednesday, the 22nd inst.

Mrs. Jas. Wright entertained the Ladies' Aid on Thursday, Oct. 23rd. The day was an ideal one and a large crowd gathered. They all had a good time and plenty to eat. At a late hour in the evening they bid good-bye, hoping to meet soon again.

H. KIESEL, Manager

Parliament Prorogued
on Saturday after
Busy Session

Edmonton, Oct. 25th.—The House prorogued this evening at 10 p. m., after a strenuous sitting of some six weeks. The past two weeks, morning afternoon and evening sittings have been held, in order to complete the business in hand. The number of private bills before the House has been very heavy, and necessitated much arduous labor. The Lieutenant Governor gave the Royal assent to a number of bills, principally those in connection with the establishing of various clubs throughout the Province, just before 10 p. m., and after giving permission for the House to dismiss for the session, withdrew. The Hon. C. R. Mitchell, Acting Premier in the absence of Premier Sifton at Ottawa, congratulated the members upon the way in which they had conducted the affairs of the Province during the session, and reformed with regret to the fact that they had been deprived of the assistance of the leader of the Opposition, through illness, but expressed his pleasure that Mr. Michener was making so good a recovery. Mr. Headley, who followed, congratulated the Deputy Speaker, Mr. Stauffer upon the manner in which he had carried out his duties during the session, and assured the government that the Opposition would not protest an item in the next expenditures of \$750 as the Deputy-Speaker's allowances. Mr. Stauffer suitably responded, thanking the members for their expressions of good will.

Hon. J. R. Boyle dwelt upon the good feelings which existed between both parties, and said that this had greatly facilitated the dispatch of business during the session. Hon. A. G. Mackay, who followed, told the House that their method of handling the affairs of the Province, was an example to the whole of the North American Continent. The National Anthem was sung by the members, after which the juniors of the House, unable to restrain the holiday feeling any longer, gave vent to it in the time-honored pelting of one another with the now useless seasonal papers sources of much former oratory and dis-cussion.
